

A man with dark hair and a light blue shirt is sitting in a white ergonomic chair at a wooden desk. He is smiling and looking at a tablet he is holding in his hands. On the desk, there is a large computer monitor displaying a colorful 2D animation of three cartoon characters. To the left of the monitor is a desk lamp. To the right is a mouse and a small potted plant. In the background, there are some books and a white storage unit.

2D Animation & Production Skill Course

2D Animation Production Skill Course Program is designed to turn your imagination into moving visuals. The course trains you in character design, storyboarding, digital drawing, and 2D animation techniques used in films, cartoons, web series, and advertisements. You'll learn how to bring stories to life using timing, motion, expression, and audio sync. With hands-on projects and creative assignments, you'll build the skills needed to create appealing and expressive 2D animated content for entertainment, edutainment, and digital platforms.

Duration : 6 Months

This course offers the ideal mix of classroom learning and industry-oriented training to meet the evolving demands of the design world. Over 6 months of classroom sessions, you'll explore every key aspect of 2D Animation, including elective specialisations and hands-on training in modern software aligned with the latest trends and technologies.

Softwares Covered

Adobe Illustrator

Adobe Photoshop

Adobe Animate

SYLLABUS

2D Animation & Production Skill Course

Adobe Photoshop – 3 Classes

Photoshop is a raster-based editing software used for image correction, retouching, and preparing visual assets for animation. These classes cover the Photoshop interface, important editing tools, and the process of exporting character elements for animation workflows.

Adobe Illustrator – 7 Classes

Illustrator is a vector-design software used to create high-quality characters, props, and backgrounds. These sessions include learning basic shapes, mastering the pen tool, vector character designing, and proper export settings for using artwork in animation.

Adobe Animate CC – 49 Classes

Animate CC is a professional 2D animation software where complete animation production is taught—from character rigging to scene creation. This module includes animation basics, character rigging techniques, walk-cycle, lip-sync, scene animation, camera movement, and final rendering to produce fully animated shots.
