EDIUS

Cinema 4D

SYLLABUS

GRAPHICS DESIGN & POST PRODUCTION SKILL COURSE

Adobe Photoshop – 7 Classes

Photoshop is used for image editing, retouching, and creating graphic assets. Classes cover essential tools, layers, corrections, compositions, and export basics.

Adobe Illustrator – 7 Classes

Illustrator is for vector-based designs like logos and illustrations. Training includes pen tool, shape building, typography, color setup, and print-ready exports.

CorelDRAW – 10 Classes

CorelDRAW is used for print layouts such as brochures, banners, visiting cards, and flex designs. Sessions include vector drawing, layout design, and print preparation.

Adobe After Effects – 20 Classes

After Effects is for motion graphics and VFX. Classes cover text animation, logo animation, compositing, green screen, transitions, and motion workflows.

Adobe Premiere Pro – 10 Classes

Premiere Pro is used for professional video editing. Training includes timeline editing, color correction, audio cleanup, transitions, multicam basics, and export formats.

EDIUS – 5 Classes

EDIUS is a fast broadcast editing software. Sessions include quick timeline edits, titling, basic color correction, and TV-ready export settings.

Cinema 4D – 15 Classes

Cinema 4D is for 3D motion graphics and modeling. Classes cover basic modeling, lighting, texturing, MoGraph tools, camera animation, and rendering.
