SYLLABUS

Studio Technology & PCR Skill Course

PCR / MCR – 25 Classes

PCR/MCR (Production Control Room / Master Control Room) covers complete broadcast workflow, signal flow, switcher usage, audio–video monitoring, and live production control. These classes explain how a television control room operates, equipment handling, live switching, graphics insertion, and overall transmission management.

Studio Camera – 27 Classes

This module focuses on professional studio camera operations, covering camera setup, framing, exposure, color balance, movement, and multi-camera coordination. Students learn how to operate broadcast cameras, manage shooting environments, handle lighting adjustments, and execute smooth camera movements during live or recorded production.
